

Measurement and Information Systems

Measurement and Information Systems

Turn Key Projects

- System and software design, installation and implementation
- Integration for automation design, electrification and mechanical and hydraulic engineering

Competence Areas

- Vibration measurements
- R&D projects
- Condition monitoring systems
- Process data acquisition and analysis systems
- Automated test systems
- Quality control systems
- Remote monitoring systems

Engineering Services

- System and software specification, application design, testing, implementation and administration
- Projects from small applications up to several man-years of product development work

Protacon Masters Efficient Tools

- Major part of the Finnish CLD certified LabVIEW™ application developers
- Over 100 man-years' experience on LabVIEW™ application design
- Strong experience of TestStand application design
- Special knowhow of SQL databases and web technologies

Test System Customers

- Abloy Oyj
- Metso Minerals Oy
- Orion Oyj
- Sampo Hydraulics Oy
- Valtra Oy Ab

R&D Project Customers

- Coherent Finland Oy
- Honeywell-Measurex Roibox Oy
- Megalock Oy
- Metso Automation Oy
- Orbis Oy
- UPM Raflatac Oy

**Certified National
Instruments Alliance
Partner and System
Integrator**
