

FuteControl Measurement and Localization System

FuteControl

Wireless Measurement and Localization System

Main Features

- Many connection possibilities for different measurement systems
- Independent from other information systems
- External database maintenance
- Data transfer to other workstations
- Cost-efficient operation

Versatile Reporting

- Web technology
- GPS localization on map
- Desired reporting interval
- Trend chart for each measurement channel
- Further calculation from measured values
- Measurement data in Excel format

Comprehensive Alarm Functions

- Limits for each measurement
- SMS messages by measurement unit
- Alarm log files

Several Hardware Possibilities

- TeleControl TC84i+
- High speed DataLogger
- CompactRio
- Compact FieldPoint
- Telit modem EZ-863 (global)

Delivery References

- Ecocat Oy
- Proventia Oy
